

How HEAL Charges for EAP Sessions

HEAL was established to underwrite the vast majority of Equine Assisted Psychotherapy services for our veterans and their families. Providing this type of therapy is expensive, and the results are compelling. We are proud and honored to serve this need. We rely on the generous contributions of our donors to provide these services. It costs \$300 per session to provide EAP services involving multiple horses, and the expertise of a mental health professional and an equine specialist. Through the generosity of our donors, this fee is largely underwritten by donations and HEAL charges participants \$60 per session. HEAL does not file health insurance claims. We understand that reimbursement ranges in the \$40-\$65 range.

A credit card is taken upon setting the appointment and can be used at the time of service for payment. Cash and checks are also accepted. However, if an appointment is not cancelled within at least 24 hours, the actual full cost of the appointment, \$300 will be assessed on the credit card. This is essential in order to enable HEAL to be the best stewards possible of our donor money. We trust that you will respect and understand the necessity of this policy.
